

# DuraVent

## Typical Installations

Refer to our “Typical Installations” to select the appropriate component parts for your installation. Important installation requirements below:

- A DVL Close Clearance Adapter must be used when connecting DVL pipe to a ceiling support box or finishing collar. When connecting DuraBlack pipe, a DuraBlack Slip Connector or Snap Lock Adapter must be used.

- A Wall Thimble must be installed with an appropriate length of chimney pipe for all horizontal through-the-wall installations. To accommodate thicker walls, the telescoping pieces can be separated, and a field-fabricated extension may be installed.

- An Attic Insulation Shield must be used in all installations that pass through an attic, regardless of whether the attic is insulated or not.

- A Firestop Radiation Shield must be used when a chimney passes through a floor or ceiling without a support box.

Installation Key	
1	DVL or DuraBlack
2	Ceiling Support Box
3	Wall Thimble
4	Chimney Pipe
5	Attic Insulation Shield
6	Flashing
7	Storm Collar
8	Chimney Cap
9	Elbow
10	Elbow Strap
11	Tee with Tee Cap
12	Tee Support
13	Chase Top Flashing
14	Base Tee / Double Tee
15	Anchor Plate
16	Firestop Radiation Shield ( <i>not shown in diagram</i> )
17	Roof Support
18	Finishing Collar
